HEALTHY HOUSING

NEW YORK'S GOT HOUSING!

SASH

SYSTEMS CHANGE

National Center for
HEALTHY HOUSING

OUTCOMES

KEY POINTS

- #1** Population health must begin where people spend their time.
- #2** The highest risk patients the health care system wants to target, are the residents of low income housing.
- #3** SASH is a health care reform model, not a housing model.
- #4** SASH is a CQI team sport.
- #5** SASH is a system within which all programs, interventions and organizations can be a part.
